Over the past year, the Town of Southwick has been looking towards the future and is finalizing the creation of a Master Plan based on your input!

It's not too late to hear from you!

If you can't make this workshop, we are planning some additional opportunities to engage with the Master Plan process and our committee!

Stay engaged at

SOUTHWICK2040.COM

We have a vision!

VISION STATEMENT

Southwick's distinctive Massachusetts location crossing the Connecticut border makes us a desirable southern New England community. Residents and visitors of all ages enjoy natural resources including lakes and fertile farmland uniquely balanced with modern services and a vibrant social atmosphere. We welcome small to mid-size businesses from services, light manufacturing and agriculture to technology and innovative start-ups and help them thrive, adapt and grow-while enhancing our community.

WHAT WE HAVE HEARD SO FAR!

Adapt to changing needs by investing in resilient infrastructure

Find a balance between our small town character and how we modernize

Support and prepare for businesses of the future

Increase reasons for people to live, work and play in Southwick

Increase social and cultural activities across town

Create an awareness program that positions the town to retain and attract residents and small-to midsize businesses

Protect more farmland, open space and our natural resources

Improve or adapt services supporting an aging population while appealing to diverse younger populations
